Hyderabad, Telangana, India — Open to Work Opportunities

SUMMARY

Full Stack Developer specializing in MERN stack and Python with strong backend architecture fundamentals. Experienced in building AI-powered platforms using Gemini API and integrating scalable REST APIs with secure authentication systems. Skilled in developing responsive user interfaces and optimizing application performance across cloud environments. Passionate about designing intelligent, production-ready applications that enhance user experience and automate workflows.

TECHNICAL SKILLS

Languages – JavaScript, Python, SQL

Frontend – React.js, HTML, CSS, TailwindCSS, Responsive UI Design

Backend – Node.js, Express.js, REST APIs, Authentication Systems

Databases – MongoDB, MySQL, Firebase

Tools – Git, Postman, ImageKit, Kaggle, Gemini API

INTERNSHIP

Front End Web Development Intern – Edunet Foundation (AICTE & IBM SkillsBuild) Aug 2025 – Sept 2025

- Completed 6-week structured internship focused on modern Front-End Web Development practices.
- Built responsive web interfaces using HTML, CSS, and JavaScript aligned with industry UI/UX standards.
- Strengthened frontend architecture understanding, debugging skills, and collaborative development workflows.

PROJECTS

SmartPrep – AI Interview Practice Platform

Live

React.js, Firebase, Clerk Auth, ShadCN UI, Gemini API

- Designed and developed a full-stack AI-powered mock interview platform with secure authentication and real-time interview session management.
- Integrated webcam recording, speech-to-text processing, and AI-generated feedback workflows using prompt engineering and Gemini API.
- Streamlined interview preparation by automating feedback generation, reducing manual review effort and improving user engagement.

PublishNow – AI Blogging Platform

Live

MERN Stack, JWT Authentication, Google APIs, ImageKit

- Developed a scalable blogging platform with JWT-secured authentication, admin dashboard, and RESTful backend APIs.
- Integrated AI-assisted content generation and media optimization features to streamline content creation workflows.
- Reduced content publishing time by approximately 40% while improving overall platform usability and content management efficiency.

AI Travel Assistant – GenAI Capstone

Link

Python, Gemini API, Prompt Engineering

- Built a Generative AI travel planner that creates personalized itineraries based on user preferences and travel requirements.
- Integrated Gemini API and prompt engineering techniques to generate recommendations for destinations, hotels, and local attractions.
- Automated trip planning workflows, reducing manual planning effort by nearly 60% and making itinerary creation faster and more convenient.

EDUCATION

B.Tech – Artificial Intelligence & Data Science

2022 – 2026

Sri Indu College of Engineering and Technology

CGPA: 8.30 / 10.0

CERTIFICATIONS

- **ISRO – Python for Beginners:** Completed foundational training in Python programming and modular development.
- **Kaggle – Generative AI:** Built prompt-engineered AI workflows using Google's AI stack and LLM applications.
- **TCS-iON – Career Edge Program:** Developed communication, workplace readiness, and agile project skills.

ACHIEVEMENTS

- Designed RFID-based Toll-Gate Automation System automating 100% toll operations.
- Achieved 90% simulation accuracy and significantly reduced vehicle wait times.
- Led hardware-software integration within a 4-member agile development team.
